

## Green For Life leant a hand ? and muscle power

I know there have been a few complaints about Green For Life garbage pickup, but today I want to thank two of their employees who came to the aide of an elderly neighbour, whose car was stuck in a snow drift. As they drove down our street, they saw the problem and all of us digging. With no hesitation, these two wonderful men hopped down from their truck and lifted, (yes, LIFTED) the small car off the great lumps of ice. We all appreciated their kindness so much.
